

CHEVRON CLEATED REPLACEMENT BELTS

/ Collaborate / Create / Convey

Fluent Conveyors offers a wide range of premium, well-constructed chevron conveyor belts at a market competitive price. Chevron conveyor belts come in a variety of cleat patterns including: open chevron, closed chevron, herringbone, u-shaped, cleat top, steep climb and more to meet the requirements of a wide variety of material applications.

100'S OF CLEAT PATTERNS

Standard mini cleats, multi-chevron, big horn, bull horn, fabclimb, fablift, longhorn and many more!

INTEGRELLY MOLDED CHEVRON BELTS

Heavy duty belts provide smooth, reliable product delivery in demanding incline applications. Constructions available with various cover gauges, compounds and with or without center support ribs.

CHEVRON OPTIONS FOR 100'S OF INDUSTRIES

Mining, recycling, food processing, bio-fuel, OCC, carpet, e-waste, manufacturing, MSW, paper, plastics, single steam textiles and more!

ALLIGATOR HINGED & TOOTH SPLICES

Alligator splicing is ideal for easy, economical installation of a low-profile belt splice. Available in continuous lengths, the system fits any belt width and provides uniform tension across the full belt width. Minimum pulley diameters range from 1 inch to 14 inches. Installation can be done with mechanical tooling or a hammer.

BOLT PLATE & HINGED SPLICES

Bolt hinged splices are ideal for belt conveyor applications subject to length adjustments because the joint can be separated easily by removing the hinge pin.

RIVET PLATE & HINGED SPLICES

Rivet Plate Fastening System is recommended for high-tension applications using rubber-plied and PVC solid woven belting and for worn belts unfit for vulcanized splices, delivering performance & longevity.

**Please note we also offer non-mechanical vulcanized endless splices.

Technical Specifications & Belt Modification Options

Please note not all belts can be configured with each option.
